

**Satellite Symposium
to the FTN Status Meeting 2012
on the occasion of Jacky Trotter's 60th birthday**

November 8th, 2012

Mainz, Johannes Joachim Becherweg 13, HS19,

13.30 Welcome

13.45- 14.15

Wieland Huttner (Dresden)

Neural stem and progenitor cells and the evolution of the neocortex

14.20-14.50

Andreas Faissner (Bochum)

Regulation of Neural Stem Cells by the Extracellular Matrix and Complex Glycans

14.55- 15.25

Frank Kirchhoff (Homburg)

NG2 cells in vivo – glial progenitors and beyond

15.30-16.00

Coffee Break

16.00-16.30

Klaus-Armin Nave (Göttingen)

New functions of myelinating glial cells

16.35-17.05

Bernard Zalc (Paris)

Live imaging of targeted cell ablation in Xenopus: a new model to study demyelination and repair

17.10-17.45

Charles ffrench-Constant (Edinburgh)

Exploring the relationship between inflammation and remyelination

17.50- 18.20

Chris Linington (Glasgow)

Autoantibody-dependent effector mechanisms in the pathogenesis of multiple sclerosis

18.25 Concluding remarks

Organized by Eva-Maria Krämer-Albers & Robin White
